Double Axle Trailer 2DR

Double Axle Trailer

Trailers are manufactured as single and double axle and used for transporting of agricultural products and other purposes. Trailers aren't self powered. Speed of trailer is limited according to country laws.

Trailers are divided into two groups as general purpose trailers and special purpose trailers. General purpose trailers are more economic for the small agribusiness. General purpose trailers are also suitable in big agribusiness but special purpose trailers are very advantageous for big agribusiness.

According to these advantageous, types of special purpose trailers as follows:

- General purpose trailers
- Cotton trailers
- Corn and Grass silage trailers
- Manure trailers
- Bale trailers

According to board construction system trailers are divided into two groups.

- a) Wood board trailers
- b) Sheet iron board trailers

In generally we manufacture our trailers as sheet iron board but according to costumers' wishes we manufacture wood board trailers. According to capacity, trailers are manufactured 4t, 5t, 6t, 7t, 8t, 10t, 12t and 14t double axle.

According to unloading system, trailers are divided into two groups.

- 1) Damper type (with a tipping system)
 - a) Rear side tipping
 - b) Right and left side tipping
 - c) Rear, right and left (three side) tipping
- 2) Fixed type (without a tipping system)

Double Axle Trailer

Specification	Units	2DR 5000	2DR 6000	2DR 7000	2DR 8000	2DR 10000	2DR 12000
